

Surround yourself with colour

So much more than just a physical boundary or privacy screen, your fence is another opportunity to add a strong and stylish design statement to your home and landscaping.

Whether it's inspired by your home's colour palette, or that of your neighbour's, or the natural environment around you, your fence deserves to be a well-considered decision.

When building a new fence or replacing an old one, COLORBOND® steel's wide range of naturally inspired colour choices give you the flexibility to beautifully complement the houses on either side of it. You can harmonise or contrast your COLORBOND® steel fence colour with your existing roof or walls, or even use it as a dramatic backdrop in your landscaping.

A COLORBOND® steel fence is remarkably strong, durable, easy to maintain, and enhances the looks, security and privacy of any property for many years to come.

STRENGTH ALL AROUND

A TRUSTED BRAND

For over 50 years, Australian homes have been built with and protected by strong, durable COLORBOND® steel. When you choose COLORBOND® steel, you can rest assured that your fence is built with a material that's designed to endure our harsh Australian conditions.

PROVEN DURABILITY

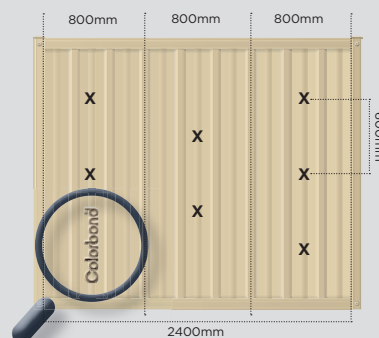

COLORBOND® steel is proudly manufactured here in Australia by BlueScope to meet or exceed relevant Australian Standards. Rigorously tested for over 50 years in some of Australia's harshest conditions, your COLORBOND® steel fence won't rot or be eaten by termites and won't contribute to the spread of fire.

DESIGNER LOOKS

A COLORBOND® steel fence looks good from either side. You can choose from a wide range of colours, profiles and designs, and even customise it to your style with lattice or slat sections and ornate post caps. Just speak to your local COLORBOND® steel supplier.

NOT ALL STEEL IS CREATED EQUAL

Make sure to ask for your COLORBOND® steel colour by name and look out for our exclusive laser branding on each and every panel.

Wollemi®

A FENCE THAT PROTECTS

FIRE PERFORMANCE

Of the fencing materials tested in a bushfire study conducted by the CSIRO, COLORBOND® steel performed the best under all exposure conditions, including testing used to simulate the potential effects of an adjacent house fire.¹ In a bushfire, you can be assured that a fence made from COLORBOND® steel is a smart choice.

PEACE OF MIND

When you build a fence made from COLORBOND® steel, you're getting peace of mind that you're helping to protect your family's home. Speak to your COLORBOND® steel supplier to see if you're eligible for a warranty², backed by BlueScope - one of Australia's largest and most respected manufacturers.

LOW MAINTENANCE

Unlike many alternatives, a COLORBOND® steel fence won't need to be repainted, oiled or have palings and other parts replaced regularly. It will keep its good looks for many years with just an occasional hose down every six months.³

• Fences: COLORBOND® steel Basalt® and Shale Grey™.

• Fence: COLORBOND® steel Woodland Grey® (shown on cover).
